

This manual describes the extension of a Nuki Universal Cylinder for the Nuki Smart Lock Ultra, using additional extension parts available at nuki.m-c.eu.

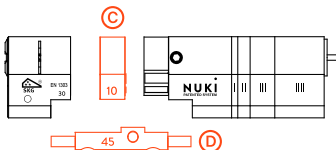

Step 1. Adjust the outer length of your Nuki Universal Cylinder

▶ Remove the screws and pull out the rod. On the left side, twist the rod 90° clockwise to unlock it.

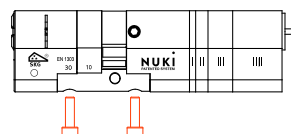

▶ Take the new orange marked rod (D)* and add the new modular extension(s) (C)*.

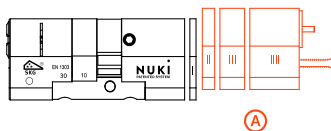

* Length of the rod and modular parts may vary depending on the needed extension.

▶ Now fix the rod again with the two screws.

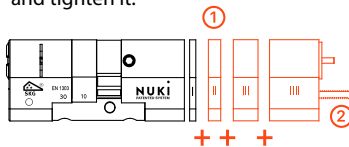

Step 2. Adjust the inner length of your Nuki Universal Cylinder

▶ Remove the screw and the orange marked modular extensions (A).

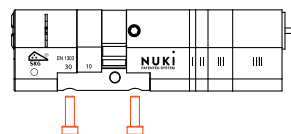

▶ Add the new modular extension parts to the desired total length*. Insert the newly supplied screw (2) and tighten it.

* The amount and length of the modular extension parts may vary depending on the needed extension length.

▶ Now fix the rod again with the two screws.

Step 3. Attach mounting plate

▶ Use the orange marked screw (B) to attach the mounting plate (E) to the inner extensions.

▶ Remove the yellow fixing screw of your Nuki Universal Cylinder.
